## PURIFY

### DetoxSPA programme

A footbath detox in combination with a deep foot massage. This treatment prepares the body for revitalisation. Far too often do we undervalue and treat our feet badly. They are the body's roots and our link to the energy from the ground. The treatment purifies, relaxes, boosts energy and encourages a good mood.

### TIME - OUT

emergency treatment

Preventative cosmetic therapy – Corrective cosmetic therapy

#### Whether a man or a woman, you can stop the advance of time!

It is true that the formation of lines and wrinkles is directly linked to the passing of time. But experience tells us that our peers never look the same. The reason is simple: the formation of lines, wrinkles and imperfections is not only due to ageing. Other factors have a part to play: pronounced muscular movements, gravity, the position we sleep in, genetics and lifestyle. Some, whether they be intrinsic or time-related factors, bring with them so-called time-related ageing. Others, namely external or environmental factors, simply aggravate the situation. Amongst the latter, sunlight has an important role to play, and, sadly, the skin ages because of it. The effects of the sun on skin are very different from the effects that intrinsic factors have, and this being so, they are treated in very different ways. In other words, the cause determines the type of treatment, product and therapy.

#### How does the time-out programme work?

This is a manual programme, it is non-invasive and needles are not utilized in its execution. We use ozone protected in cyclodextrins to aid gradual, controlled absorption. Renewal is achieved by use of a mix of alfa-cheto hydroxy acids, poly hydroxy acids, and lactobionic acids. Matrix™3000 ensures the regeneration process, the repair process is aided by Dermaxil™ and the skin is strengthened with Syn@-Coll. I would underline that we have changed the rules of the game by increasing the level of non-invasive cosmetic procedures used to restore the skin. Specific strategies, high performance products and advanced technology are used to deal with the signs of ageing.

The skin is activated, renewed, stimulated and perfected. It undergoes intense treatment, the results of which are truly amazing. Capillary skin too is included in the treatment area and phials and treatment packs suited to the type of hair and skin are used.

#### When should I start?

If you have already started to notice the signs of age in the mirror, immediately. Ageing can happen at any time. Do not allow ageing to have that time. The passage of time has no impact on the quest for perfection or the search for beauty, so do not allow it to leave any marks.

### **How many should I do?**

This is a difficult question to answer as every person is different. I do think at least one. We work on the understanding that everyday life is led in a rush and our client-specific treatments are designed to deliver maximum benefit on the basis of that consideration. Ideally, you should have one treatment and the second session on the following day. Repeating this at least three times in three months would deliver great results.

### **And the body?**

Never forget your body. LIVE is LIVE Body is a profoundly revitalising treatment.

### **How to book**

Only a few of our colleagues can deliver these treatments and you would have to make a reservation before you arrive to ensure the specialist is available.

If you are, however, susceptible to allergic reactions or sensitive to products that are generally well tolerated, we would advise you to opt for low concentration treatments.*

## Sense deprivation and flotation therapy

### Floating room news

Imagine yourself floating weightlessly, immersed in water and buoyed by salt, in a cradle of silence and a complete absence of light. This is the sense deprivation chamber where the mind rids itself of stress and tensions and rediscovers concentration and vitality. Many celebrities from the worlds of science, literature and art enjoy this therapy as it facilitates introspection and visualization and encourages great clarity of mind.
